

Company Environmental Policy

Objective Imaging Ltd (OI) is fully committed to the core principles of environmental sustainability through identifying and addressing the environmental impact resulting from and associated with our activities, products, and services.

OI is fully committed to minimising and reducing our environmental impact across the scope of our operations and business activities and through the products and services that we deliver to our customers.

OI is fully committed to improving the environmental efficiency of our business facilities to reduce energy consumption and impact on other natural resources, such as water usage, waste products, etc.

OI is fully committed to improving the energy and resources efficiency in the design, production, and deployment of our products.

Promotion of the conservation of natural resources is a priority consideration for the business in all its activities and we encourage our customers and partners to adopt environmentally sound policies and practices.

As a designer, user, and seller of electronics and related technology we are specifically committed to support and actively promote compliance the following guidance, Regulations, and environmental standards:

- WEEE
- REACH
- RoHS
- Conflict Minerals

Signed for and on behalf of Objective Imaging Ltd:

Date: 9 February 2022

Lee Payne
(*Technical Director*)
